

Underwater Viewfinders

Have you ever wondered what it would be like to have clear vision underwater? Well now is your chance!

Materials:

Water source, recycled plastic container, metal can or ice cream container, strong rubber-band, clear plastic wrap.

Instructions:

- Cut off the bottom of a recycled container or metal can.
- Stretch the clear plastic across the bottom and secure with elastic bands.
- Dunk about $\frac{3}{4}$ of the viewer straight into the water and have a look!
- If you're using an ice cream tub cut out the lid and cut off the bottom.
- Lay plastic wrap on the top and secure with the lid.

Questions:

- What is the coolest thing you see?
- How many different colours can you see underwater?
- Are there more aquatic plants or animals in this water source?
- Variation: Have someone place an object somewhere underwater to find. Take turns hiding and seeking objects.
